AUSTRALIA'S ONLY AS4760 COMPLIANT DEVICE

NEW TECHNOLOGY

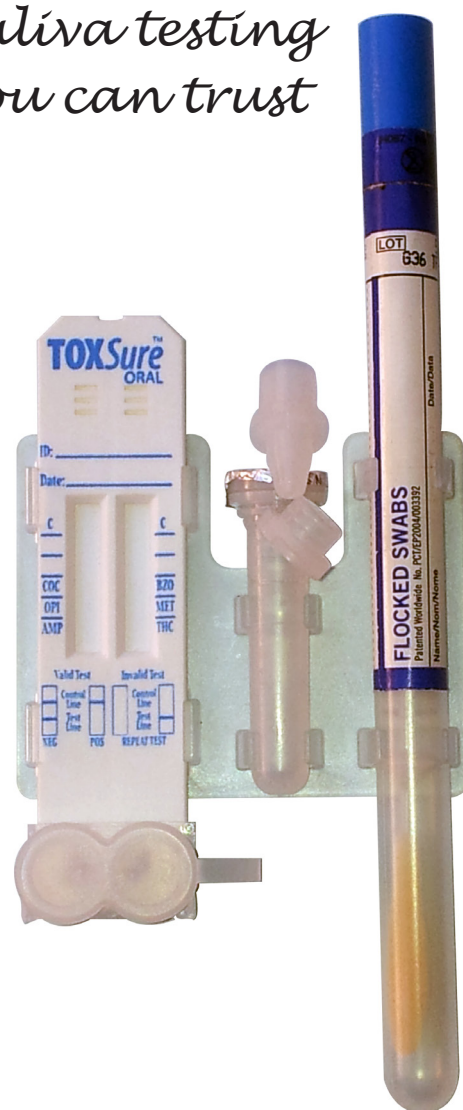

ToxSure II Now available in Australia

ToxSure Oral II is a point of collection test for the simultaneous detection of six drugs of abuse in oral fluid specimens. It is a lateral flow immunoassay in which each drug of abuse analyte is represented by a separate line in the test window of the device. The test system consists of an untreated sample collector, a buffer bottle and a test device combined in a Clip-System. ToxSure Oral II is intended for use in the qualitative detection of the following drugs of abuse in human oral fluid:

AUSTRALIAN STANDARD

Component	Level
Amphetamine (AMP)	50 ng/ml
Cocaine (COC)	50 ng/ml
