

ORASCREEN

*“Detect When
You Suspect”*

The One-Step Saliva
Drug Screening Test

- Tests for parent drug
- Collects saliva directly into the testing device
- No contaminants to compromise accuracy
- Uses only reagents of highest quality - developed and manufactured in the US

Available on 4 drug panel format

- THC
- COC
- OPI/OXY
- MET/MDMA

Detection window is 24-36 hours with THC detection at 6-8 hours after use
